

SciFi Communication Systems cc. (SciFi Systems) is a 50% Black owned, BEE compliant business.

The name “SciFi” is derived from the pop-culture references to “Science Fiction”. In pop-culture, SciFi is characterised by super-advanced and as yet undiscovered technologies; with yet-to-be-invented devices and services, all set in an alternate reality based on scientific advancement.

Our name, “SciFi Systems” therefore serves as a constant reminder of our commitment to radical innovation and the pursuit of ever sophisticated, sublimely simplified ways of doing business and extrapolating value for our clients. We're proud to say that most of the solutions which we develop for our clients often represent the epitome of what today's technology can offer. Whether this be in the production of highly automated web based processes, e-commerce integration, mobile strategy development (SMS, WAP, MMS) or bulk email marketing solutions, SciFi Systems is an exceptionally unique organisation that is ideally suited to help you successfully navigate the choppy waters of rampant technological advancement so common today.

Our focus on the innovative usage of technologies and our commitment to service excellence are our key differentiators. Put us to the test.

Sincerely,

Charles Ash
Managing Partner
